ALTERNATE TECHNOLOGIES FOR ZLD & VALUE ADDITION IN MOLASSES BASED DISTILLERIES

19th January 2021 11:00 hours (IST) onwards

The molasses based distilleries are required to comply norms of "Zero Liquid Discharge (ZLD)". At present, the two technologies in vogue are through bio-composting or incineration. There is always a debate about the efficiency of the system(s) and merits/demerits of each. To cope up with the increasing demand of ethanol and to cope up with EBP requirements, Government of India has stressed on capacity building and use of feed stock other than those available with the sugar industry. Change is the law of nature and technology is ever changing. It is the need of hour to innovate and adopt other technologies which may render some value added products besides ensuring ZLD. In this backdrop, the present is webinar has been planned.

Convener
Mr. Anoop K. Kanaujia
Asst. Professor
National Sugar Institute
akk.nsi@gmail.com
Ph. +91-7054202100

Impresario
Prof. Narendra Mohan
Director
